

Screening Can Help Save Your Life¹

Colorectal cancer is the third-leading cause of cancer deaths.²

About 53,200 deaths are expected in 2020.² Colorectal cancer may be preventable, detectable, and, if **found early**, treatable.²

9 out of **10** times,
early treatment
saves lives.*

*According to the American Cancer Society, the 5-year survival rate for colon cancer caught early is 90%.²

Talk to your healthcare provider to find out if it's the right time for you or your loved ones to get screened, especially if you^{2,3}:

- ▲ Are 45 years of age or older
- ▲ Have a family history of colorectal cancer or a colon polyp
