

Screening Can Help Save Your Life¹

Colorectal cancer is the second leading cause of cancer deaths.

About 50,000 deaths are expected in 2017.² Colorectal cancer may be preventable, detectable, and if **found early**, treatable.²

9 out of **10** times,
early treatment
saves lives.*

*According to the American Cancer Society, the 5-year survival rate for colon cancer is 90%.²

Talk to your health care provider to find out if it's the right time for you or your loved ones to get screened, especially if you³:

- ▲ Are 45 years of age or older
- ▲ Have a family history of colorectal cancer or a colon polyp

Visit LoveYourColon.org to learn more about getting screened
